

TSEGAYE KEBEDE BADE

SOFTWARE ENGINEER

CONTACT

- +251 925480393
- tdrag301@gmail.com
- Addis Ababa, Kolfe keranyo

SKILLS

- Teamwork
- Time Management
- Good Communication
- Project Management
- Systems analysis & problem solving
- JavaScript, Node.js, React
- MongoDB, basic SQL

LANGUAGES

- Amharic
- English

HOBBIES

- Reading technology blogs & learning new tools
- Watching football and sports
- Cooking

REFERENCE

Mulugeta Getachew, dean
Phone: 0914196411

PROFILE

- Motivated and curious Software Engineering graduate with a passion for building practical solutions and learning new technologies. Strong background in full-stack web development, systems analysis, and process improvement. I enjoy working on team projects, adapting to new challenges, and finding creative ways to apply technology to real-world problems in areas like banking, telecoms, and public services.

WORK EXPERIENCE

- During my internship and academic projects, I gained hands-on experience building real-world applications, analyzing user needs, and turning requirements into working solutions. I learned to design, develop, and document full-stack systems, collaborate with teams, and communicate technical concepts clearly. This practical background has prepared me to contribute effectively to roles in both technical development and operational support in organizations like banks, telecoms, and public services. I also used Agile methods, version control tools like Git, and practiced teamwork, adaptability, and thorough documentation to balance technical and non-technical skills.

PROJECT HIGHLIGHTS

Instructor load Tracking Management System (LTMS) - Final Year Project

- Automated academic load tracking and approvals with a MERN stack app.

Personal Portfolio Website

- Designed and deployed a responsive website showcasing projects, skills, and contact information.

EDUCATION

BSc in Software Engineering 2021-2025
School of computing | Dire Dawa University
GPA: 3.59 / 4.0 | Exit Exam Score: 74/100

ACHIEVEMENTS

- Completed over 3 full-stack web projects during university
- Recognized by mentors for thorough documentation and teamwork
